Feature Highlights

Measure Twice, Order Once

What's more annoying than not having a great appliance? Having to re-order the

correct size. Make sure this appliance will fit in your home.

The Right Power for the Right Food

Sensor cooking helps ensure even cooking throughout your foods with less guesswork. Choose your power level and let the microwave handle the rest.

Clear the Air

A powerful fan works to keep the air clear of odors and smoke so that fish won't hang around in your kitchen any longer than it needs to.

Ready, Touch, Go

From pizza to popcorn, the Quick Touch buttons let you get your favorite meals and snacks hot and ready at the touch of a button.

Kid Safe Microwaving

With the press of a button, child lockout goes into action, securing the microwave from activation and helping prevent melted toys.

Description

Item # 02280333000 Model # 80333

Child Lockout Protection
300-CFM Ventilation System

One-Touch Sensor

Kenmore 1.7 cu. ft. Over-the-Range Microwave—More Cooking Options

The **Kenmore 80333 Over-the-Range Microwave** makes it easy for even the busiest families to eat well. Quiet yet powerful, this Kenmore microwave has tons of cooking options, from sensor defrosting to preprogrammed options. Heat up leftover lasagna, defrost pre-made meals, quick-steam veggies or even poach fish—the one-touch controls and powerful 1,000 watts give you more control and versatility in the kitchen. A 2-speed fan helps to ventilate air and remove smoke and odors (even from that poached fish)

from your kitchen while the child lock-out function keeps little hands from tossing in unsuspecting toys. Make the most out of your meal times without having to toil over a stove each night with the Kenmore over-the-range stainless steel microwave.

Heat Up Family Meals

This 1.7 cu. ft. Kenmore microwave has enough cooking capacity to take on family-sized frozen entrees and leftovers, perfect for heating up a good, healthy meal without babysitting the stove.

Powerful, Even Cooking

The 1,000 watt cooking power delivers even heating and cooking, no matter if you're defrosting, cooking or re-heating. 10 power-level settings give you more cooking control so your food comes out hot and delicious each time, no frozen centers.

Easy to Use Controls

Quick Touch buttons give you easy access to a wide selection of preprogrammed settings, like Popcorn, Melt/Soften and Potato. One touch controls let you automatically cook for 1-, 2- or 3-minute cycles so you can toss in a meal or leftovers with less fuss.

Oh-So-Sensitive

Sensor Cooking and Sensor Reheating take the guesswork out of getting food hot and ready to eat by monitoring specific levels of humidity during the cooking cycle. Simply make a selection for foods like bacon, frozen dinners, rice or casseroles, and let the microwave do the rest.

No Lingering Odors

A 300-CFM 2-speed venting system helps to clear the air of smoke from the cooktop and odors from the whole kitchen. No more fishy smell hanging around after dinner.

Can this model be mounted under a counter rather than over a range? Given its ductless option, I would think so. Please advise

[1 answer](#) | [add answer](#) | [flag](#)

MagGat | Mar 29, 2018

Hi there. Per our appliance team, As long as the install dimensions are to spec, you would be fine. However, over the range microwaves have a mounting bracket that needs to be attached to the back wall studs to support the weight of the unit. check out counter top microwaves. Thank you!

is there any way to adjust the touchpad control panel? We're having to almost "pound" on every number and the start/stop buttons to activate them. It shouldn't take 2 -3 (or 5- 6) presses to start the microwave. Is this a defect of this unit or overall poor functionality? Thanks!

When the timer runs out on the microwave, how many "beeps" (and how long) does it give? And does the beep end when you open the door? Our current microwave does three 3-second beeps, and it doesn't stop even if you open the door; you have to actually hit "Stop/Cancel" to stop the sound, and it's ANNOYING. Don't want the same for our next microwave.

[2 answers](#) | [add answer](#) | [flag](#)

shaymie2012 | Sep 5, 2016

It does three long, loud, high pitched beeps, and repeats every few seconds. It's incredibly obnoxious, and it's either that, or no sound at all. If you're concerned about noise, I'd recommend anything else.
