Not the best choice! I agree with the other 1 star reviews!

I've had my fridge for about a year now. I have the same issues these 1-star reviewers shared, plus some!

Dmsdaffy | Feb 16, 2017

Hi there. Per appliance expert; Magnets will not stick to true Stainless steel (the front of unit) but magnets will stick to the sides that are painted metal. Thank you.

I had this refrigerator installed today. It runs very quietly other than a low volume but high-pitched sound. What might be causing this and can I expect it to go away?

Do NOT buy this fridge.... Kenmore Elite is made by LG and their motors are VERY loud and vibrate. YOU might not hear it in the kitchen but you will in the rest of your house. I learned the very hard way that LG's condenser motors are now SUPER noisy and placed low to the ground and the back so it will vibrate you floor and walls. Do NOT buy!!!

We had our refrigerator installed (# 73133) a few days ago. Everything inside is nice and cold, but the water from the dispenser is lukewarm. I can't even consider it cool. I don't want to change the temp inside the refrigerator (35 degrees). Is there something we can do to have cold water from the dispenser?

[1 answer](#) | [add answer](#) | [flag](#)

Sizzer | Aug 1, 2015

Hi There! Thanks for the question, the dispenser is not a cold water dispenser only a water dispenser, it is however possible to get cooler water from it by limiting use of the dispenser and when you call for water expect the first 3 oz. to be warmer than the next few ounces. I know this is not what you want to hear but this is the way all dispensers now operate.

Is this refrigerator stainless steel, or a coated metal that looks like stainless steel? Unlike other of your french style refrigerators, this one does not specifically say "stainless steel."
